OBJECTIVE

Final-year B.Tech Computer Science student passionate about building scalable software systems and full-stack applications, with hands-on project experience in Python, Java, REST APIs, and AI-integrated solutions. Strong foundation in Data Structures & Algorithms, OOP, DBMS, and Operating Systems. Eager to contribute to digital transformation and engineering initiatives and grow within a global technology environment.

TECHNICAL SKILLS

Languages: Python, C++, Java, C#, SQL

Frameworks & Libraries: FastAPI, React, Node.js, Express.js, .NET

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks (TCP/IP, HTTP/REST)

Databases: MongoDB, MySQL

Tools & Concepts: Git, GitHub Copilot, Vibe Coding, Postman, Jupyter, REST APIs, SDLC, API Architecture

EXPERIENCE

Gen AI Data Annotator Intern — iMerit (via RTNS) Jan 2026 – Apr 2026

- Performed high-quality data annotation for Generative AI and LLM training datasets
- Reviewed and labeled text, image, and conversational data to improve model accuracy and reduce hallucination
- Collaborated with cross-functional teams to meet annotation quality benchmarks and delivery timelines
- Applied domain knowledge to ensure consistency across large-scale annotation tasks

AI/ML Intern — Eduskills (AICTE & IBM) 2024

- Performed data preprocessing and feature engineering on structured datasets
- Built and evaluated predictive ML models, applying software engineering practices for reproducibility
- Documented model performance and contributed to project reporting

PROJECTS

PurePlate – AI Food Allergen Detection System [GitHub](#) 

Python, FastAPI, React, MongoDB, Gemini API

- Designed and built a full-stack web application following modular software design principles
- Developed RESTful APIs with JWT-based authentication for secure and scalable request handling
- Integrated LLM APIs for ingredient recognition achieving 90%+ accuracy in structured output generation
- Engineered prompt workflows reducing manual processing effort by 40% through automation
- Implemented real-time response handling and optimized client-server communication end-to-end

Joya – AI Personal Assistant (RAG-based) [GitHub](#) 

Python, FastAPI, LLaMA 3, RAG Pipeline

- Built a Retrieval-Augmented Generation (RAG) pipeline for contextual document-based Q&A
- Developed document ingestion, vector embedding, and query retrieval modules with clean separation of concerns
- Reduced API response latency by 30% using Server-Sent Events (SSE) for streaming responses
- Applied prompt engineering techniques to minimize hallucination and improve factual accuracy

EDUCATION

B.Tech in Computer Science & Engineering — JIS University, Kolkata 2022 – 2026

CGPA: 8.70

Class XII (Science) — Banasthali University 93%

Class X — Ganga Global School 87%

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- Introduction to Artificial Intelligence — IBM
- GitHub Copilot Fundamentals — Microsoft Learn

Achievements

- **Best Paper Award** — 4th International Conference on Data, Electronics and Computing (ICDEC 2025), Jabalpur, India — for paper: *"Krishi Dravya: An Artificial Intelligence based Application for Sustainability in Agriculture"*
- Team Lead — Smart India Hackathon 2024 (Internal Level)
- Frontend Developer — Hack4Bengal 2025
